DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 62-63,66,67-68,70 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuura. Matsuura discloses a vehicle having frame therein and a fluid-containing bag (12) attached to the frame. A deformable cover (11) surrounds the bag and a constraining means (15) constrains the flow of the fluid from an upper portion to a lower portion (see Fig. 4).

3. Claims 62-63, and 74 are rejected under 35 U.S.C. 102(b) as being anticipated by Breed Great Britain Patent No. 2289786. Brred discloses a vehicle having frame therein and a fluid-containing bag (1040,1180) attached to the frame.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3636

5. Claims 37-43,45-46,48,50-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuura in view of Breed (Great Britain 2289786). Matsuura shows all of the teachings of the claimed invention except the use of anticipatory crash sensor for determining that a crash is about to occur. Breed teaches the use of a vehicle having an anticipatory crash sensor for determining that crash is about to occur. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the vehicle of Matsuura with the anticipatory crash sensor, open cell foam and stretch seam, as taught by Breed in order to properly locate the cushion arrangement prior to an accident while providing additional support. Furthermore the method steps as recited would have been incorporated within the use of the invention, as taught by Matsuura in view of Breed.

Allowable Subject Matter

48
10/22/02 6. Claims 26-36⁶⁰⁻⁶¹ are allowed over the prior art made of record.

7. Claims 44,47,49,75-84 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 26-59 have been considered but are moot in view of the new ground(s) of rejection.
